

PUBLIC-SECTOR CAPABILITY STATEMENT / ENONCE DE CAPACITES

# Software automation for public institutions.

Auvant helps municipalities, government organizations, and public institutions modernize operations with bilingual, accessible, documented systems built for long-term ownership. / Auvant aide les institutions publiques a moderniser leurs operations avec des systemes bilingues, accessibles, documentes et concus pour durer.

Core capabilities	Government fit	Delivery posture
Software automation Applied AI workflows Municipal technology Operational dashboards Bilingual public-service tools	French and English delivery WCAG 2.1 AA target Documentation and handoff Procurement-friendly scoping Long-term maintainability	Data minimization Access control Encrypted transport Version-controlled code Traceable decisions

## How we work with government

- Scoping: objectives, constraints, users, data, risks, bilingual/accessibility requirements.
- Specification: deliverable scope, acceptance criteria, deployment plan.
- Build: regular releases, demos, testing, corrections, continuous documentation.
- Launch: controlled deployment, handoff, light training, post-delivery support.

## Concrete use cases

- Citizen request intake and internal follow-up automation.
- Bilingual portals for forms, registrations, permits, or service requests.
- Document processing, data extraction, and case routing.
- Dashboards for operations, compliance, or accountability reporting.
- Case, permit, inspection, or approval workflow tools.

## Security, privacy, and governance

- Auvant does not claim certifications it does not hold.
- Practical controls: data minimization, least-privilege access, encrypted transport, separated environments, logs where needed, and documentation suited to the mandate.

## Sample engagement types

- Citizen request portal: bilingual intake, internal tracking, notifications, exports.
- Document automation: field extraction, human validation, classification, synchronization.
- Operational dashboard: indicators, access roles, consolidated data, reduced spreadsheet dependency.

**Next step:** A short conversation can identify the right format: scoping note, proof of concept, fixed mandate, or ongoing support. / Une courte discussion permet de cibler le bon format.
